The status of the claims is as follows:

The claims currently before the Examiner are those allowed in the parent file, 08/615,814. Amendments after final B-E remain non-entered. Amendment F was entered in the parent file and remains entered in the current file. Specifically, the claims pending are 1, 10, 12, 14, 15, and 23 as filed in F (5/21/1997); 2 and 4 as filed in A (11/12/1996); and 3, 5-7, 16, 18, 19, and 21 as originally filed in 08/615,814 (3/14/1996).

10 *The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:*

15 *(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.*

Claims 1, 2, 4, 6, 10, 12, 14-16, 18, 19, 21, and 23 are rejected under 35 U.S.C. § 102(b) as being clearly anticipated by Spanish patent # 289561 (hereinafter referred to as '561).

20 With regard to claim 1, contrast figures 1C and 2C with figure 3 for the planar vs. bent conditions. With regard to claim 2, see the embodiment of figures 2a-d and 3.

The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

25 *A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not*
30 *be negated by the manner in which the invention was made.*

5 *Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.*

Claims 5 and 7 are rejected under 35 U.S.C. § 102(b) as anticipated by or, in the alternative, under 35 U.S.C. § 103 as obvious over '561.

10 Claim 5 recites an "interwoven piece of fabric". '561 teaches the use of "sticking plaster" for material B which would appear to meet this limitation. It is the Examiner's understanding that "sticking plaster" is a European term used to refer to bandage materials such as gauze. In any event, it would have been obvious to one of ordinary skill in the art to have used a sterile, non-irritating, oil-absorbing material for B of '561

15 because it contacts the nose in use. Claim 7 recites "release liners". Given that '561 teaches on page 5, paragraph 4, that the nasal bandage can be packaged with the adhesive already on it, it would appear inherent that release liners are present for useability. In any event, it would have been obvious to one of ordinary skill in the art to have so provided the '561 device so as to allow the bandages to be removed from

20 their package and stuck on the nose just as adhesive bandages sold under the trademark "BAND-AID"™ are.

25 *Claims 1-7, 12, 14, 15, 16, 18, 19, 21, and 23 are rejected under the judicially created doctrine of double patenting over the claims of copending patent numbers 5533499, 5533503, 5549103, and 5476091. The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as is clearly seen by comparison of*

the claims. Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. In re Schneller, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP 804.
